Make Any Remote Smart

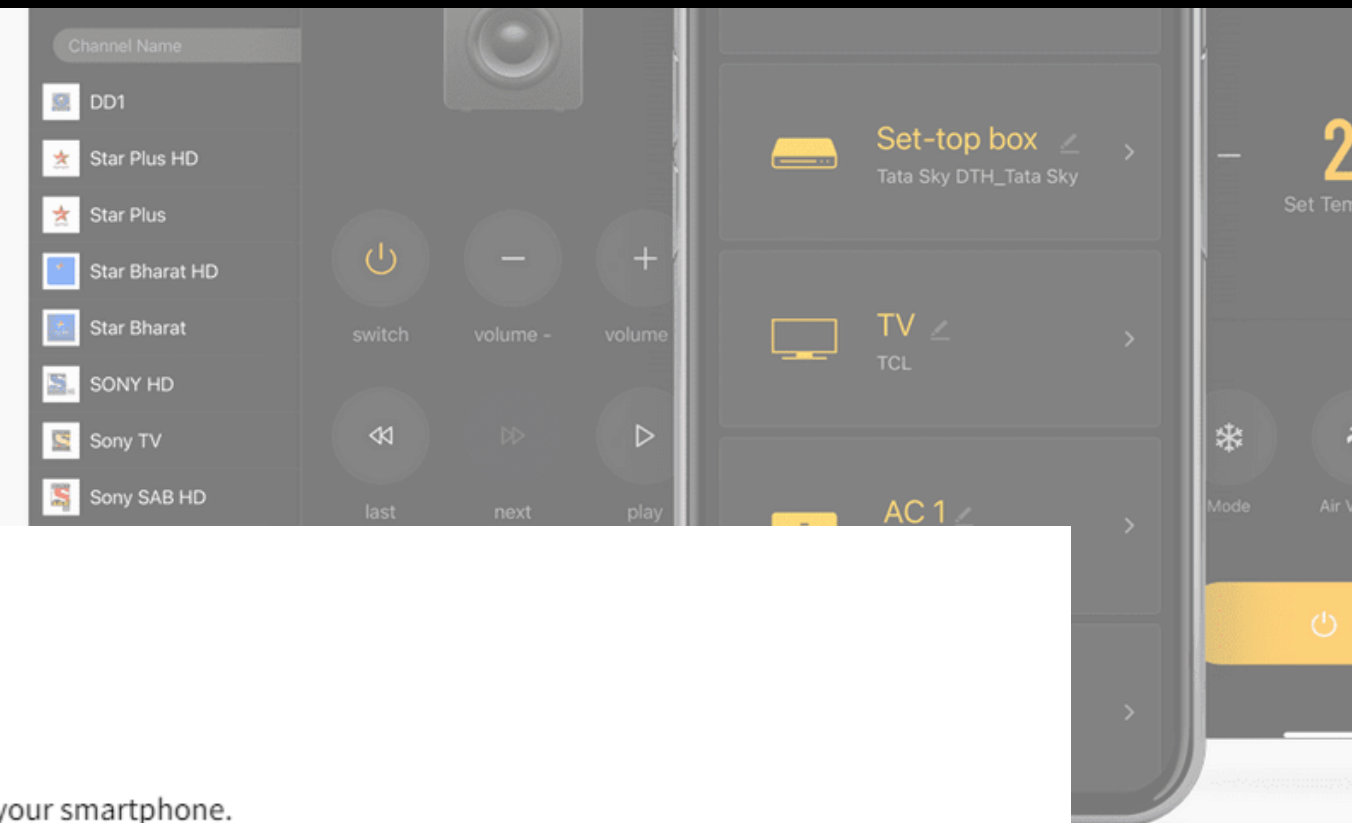

Universal Remote Control

A single device that has controls for all your appliances! This concept is not a dream. With SmartiQo's Smart Remote Control, it has become a reality.

Many Devices One Sensor

Imagine: You are sitting in a room and you wish to turn off the AC in the other room. All you have to do is take out the smartphone from your trouser's pocket and tap! The AC will be turned off. This is not only applicable for ACs at your place, but for every device that can be currently being operated via IR technology-based remote controls. SmartiQo's Smart Remote Control will let you operate such appliances at your place via your smartphone.

Smart Video Door Bell

At your home or not at your home, monitoring of your door would not be an issue if you are utilizing SmartiQo's Smart Video Door Bell.

ONE TOUCH RINGING.

What better place to start securing your place, then your door?

SmartiQo's Smart Video Door Bell lets you control the ins and outs happening at your door via smartphone. So, no more running out to the door to see who's it, while baking an important meal in your kitchen, or missing out on someone because you are in your bathroom.

Cloud Storage

Full HD Recording

Motion Detection

HIGH CLASS QUALITY OF TAPING

Record | Capture | Playback

The inbuilt camera of SmartiQo's Smart Video Door Bell will give you the feel of the faces found around your door so that you can recognize and take immediate action of whether to allow or disallow the entry and exit of that visitor.

Smart Wifi Camera

Your security is SmartiQo's Smart Camera's top priority

VIDEO RECORDING AS WELL AS TWO WAY AUDIO POSSIBLE

Camera at work

SmartiQo's Smart Camera will video record the footage nearby and let you display it via your smartphone. It will also let you strike a conversation with the person in front of the device. This essentially means that with SmartiQo's Smart Camera in operation, it will be next to impossible for an intruder to enter the place where it is fixed without your permission. Ensuring the security of your place was never this easy as well as intriguing, as much as it gets after the installation of SmartiQo's Smart Camera.

Smart Panel Light

Grant your places a little life by lighting them with SmartiQo's Smart Panel Light

Smartly Light up the dark corners

Position SmartiQo's Smart Panel Lights for granting lights and in turn, life to all the dark corners at your place.

Whether it be the ceiling of your place or the dark floors, as well as floor spaces, you can install SmartiQo's Smart Panel Lights and enlighten them.

The difference between ordinary Panel lights and SmartiQo's Smart Panel lights is, they are self-reporting on your smartphone and can be controlled, and additionally scheduled from the same.

Choose your preferred color

RGB Controller

Light Temperature Control

Choose color temperature

SmartiQo's Smart Panel lights let's you control your place's light according to your need. Need a light that lets you concentrate? So be it! Need a light to groove into a party mood? Here you go! SmartiQo's Smart Panel Lights at your disposal.

CCT Round Panel Light

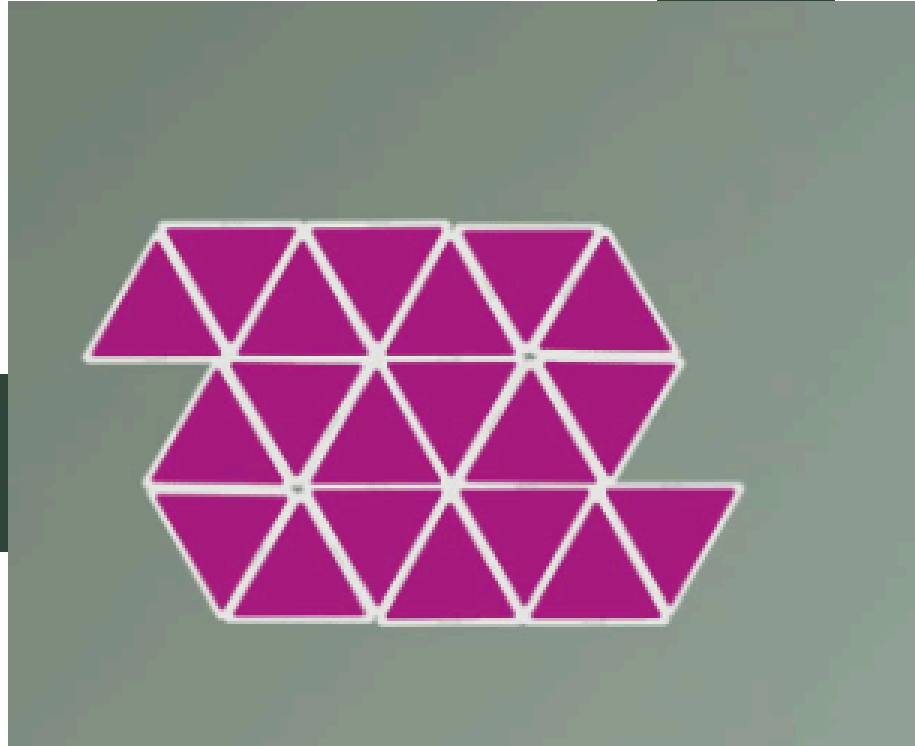

CCT Square Panel Light

RGB + CCT Round Panel Light

RGB + CCT Square Panel Light

Nano Modular Lights

Connect the triangular panels together into any desired layout, abstract forms or your favourite shapes

LET THE LIGHTING OF THE ROOM, REFLECT YOUR MOOD

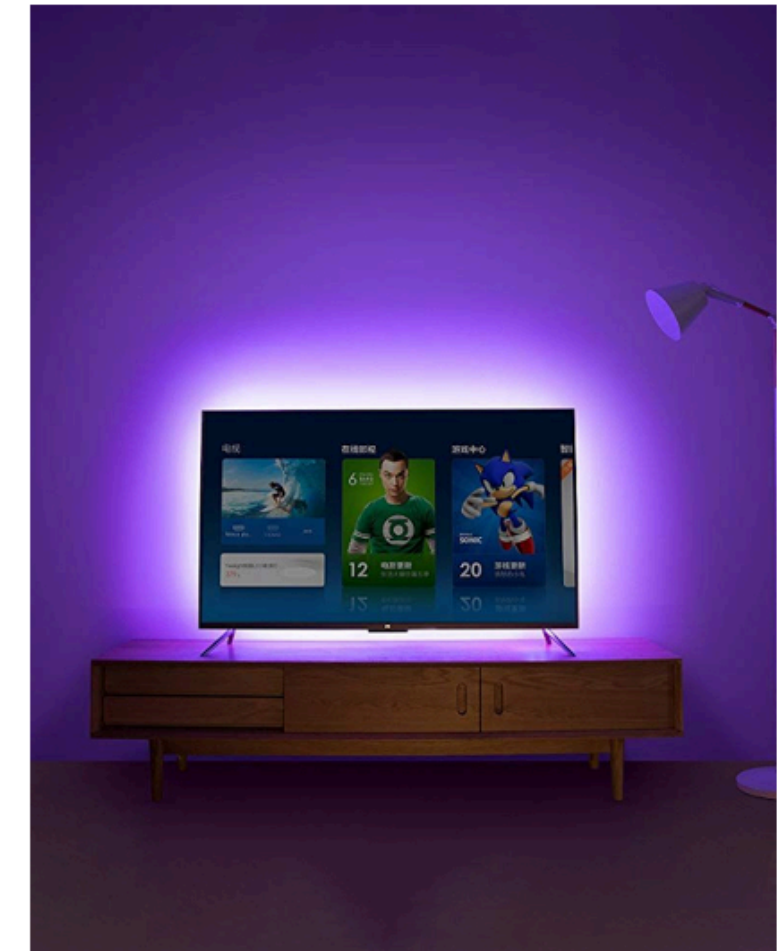

Ultimate Lightening Decor

Appointing SmartiQo's Nano Modular Lights at your place would mean playing with the lights at that place in the most creative manner possible. Install it on a wall, in any design you wish to, it will not only be in-sync with the music of that place but also be mobile enough to keep on changing colors when the rhythm of your music changes.

Using SmartiQo's Nano Modular Lights would make you feel that the adage "even walls have ears," is incomplete, it should rather be "Your place has secret ears. And on hearing you, they empathize with you by changing the lights."

Industrial Automation & Controls for Water & Wastewater

Water level controllers that automatically adjust the water level save energy. They do it by automatically turning off the motor when the tank is full and when there is no water flow to the tank. This means that less water and energy are utilized to control a water supply.
